

MOUSSA ISMAEL

Software Engineering Student | Full-Stack Developer & Aspiring AI Engineer

moussaisma05@gmail.com | +227 89 85 83 80 | Niamey, Niger
linkedin | github.com/Ismaïlou | portfolio-smael.vercel.app

PROFILE

Master's student in Software Engineering, passionate about web/mobile development and Artificial Intelligence integration. Strong practical experience designing innovative solutions and web applications. Certified and qualified through international programs.

SKILLS

Technical: Python, JavaScript, SQL, Django, DRF, ReactJS, React Native, Expo, Streamlit, Docker, Git, Linux, PostgreSQL, MySQL, REST, FastAPI, Redis, PostGIS, APIs, TailwindCSS, Figma, NLP, OpenCV, NextJS.

Soft Skills: Collaboration, Curiosity, Time Management, Problem Solving, Analytical Thinking, Adaptability.

LANGUAGES & ENGAGEMENT

Languages: English, French

Engagements: IEEE Student Member, GDG Niamey & Lomé Member, DevByte Community Contributor, University Parliamentary Debate, UNVP Volunteer.

EDUCATION

Master's in Software Engineering (ongoing)
École des Mines, de l'Industrie et de la Géologie (EMIG), Niger
2025 - 2027

Bachelor's in Software Engineering — Highest Honors
École des Mines, de l'Industrie et de la Géologie (EMIG), Niger
2022 - 2025

Baccalaureate, Science Track C — Honors
Groupe Scientifique Sigma, Lomé, Togo

CERTIFICATIONS

- OCI AI Foundations — Oracle (2025)
- Stanford Code in Place 2026
- ICSC Qualification Certificate
- D-CLIC — Junior Web Developer
- Digital Marketing Certification — Force-N (2026)
- Entrepreneurship Certification — Force-N (2025)
- CS105: Introduction to Python
- CS101: Intro to Computer Science I
- PRDV200: Communicating with Data
- ESL003: Upper-Intermediate ESL
- IEEE Student Membership (2024)
- FREE OpenCV BootCamp

PROFESSIONAL EXPERIENCE

AI & Full-Stack Development Intern

JaciGreen | 2026

- Developed an intelligent platform for water hyacinth detection.
- Contributed to fine-tuning a YOLOv8 model for automated water hyacinth detection.
- Designed APIs with FastAPI, integrated geospatial data with PostGIS, and containerized services with Docker.

Full-Stack Developer

Nexcellus | Niger | January 2026 - April 2026 (3 months)

- Designed, developed, and deployed a digital platform for professional coaching and youth support.
- Defined the technical architecture (Next.js, Prisma, secure APIs).
- Contributed to improving youth employability through digital solutions.

Front-End Developer & UI Designer

DevByte Community | Nigeria — Remote | August 2025 - Present

- Contributed to Figma design and front-end development (ReactJS) of the DevByte Community website.
- Collaborated with Project Managers and front-end/back-end developers.

Full-Stack Developer Intern

Novatech Niger | April - June 2025 (3 months)

- Designed and developed the EMIGResto platform (Django backend, React frontend) with REST API architecture and PostgreSQL.
- Implemented role-based authentication, ticket management, and endpoint performance improvements.

IT Maintenance Assistant

NIGELEC | July - September 2024 (2 months)

- Provided support and maintenance for computer workstations and network equipment, ensuring the availability of critical services.

PROJECTS

FaceLogin — Streamlit | DeepFace

Facial-recognition attendance system with automatic PDF report generation and absence alerts.

Mini Educational Chatbot — Python | Streamlit

Intelligent educational chatbot with quiz mode, text-to-speech, and an enriched knowledge base.

EMIG Resto — Django | React | Expo

University restaurant management application (menu, reservations, digital tickets, inventory management).

Ledger Pro | PWA & OCR

Mobile/web application facilitating small-business digitization and financial management.
